aton dermoscopes are synonymous with reliability, quality, ergonomics and design. they are extremely simple and user-friendly

Two new version to suits individual needs

atonLite developed for a first approach to the dermoscopy

atonPlus developed for clinicians requiring multiple type of lighting and intensities to perform an accurate exam

RELIABILITY

You'll never run out of light thanks to the battery level indicators on all models
Lighting system with high quality and long-lasting led

QUALITY AND FUNCTIONALITY

Polarised and non-polarised white leds, which can be used in combination with amber leds (only for aton plus) with 3 or 5 levels of light intensity.
The acromatic lenses and the hi led lighting system ensure high colour rendering for a rapid screening.
Possibility of carrying out contact exams, with and without immersion, and no contact exams (acontact accessory).
Millimetre scale, screen- printed on slide, for measuring the lesions.

ERGONOMICS

Useful knurled ring for a better grip, even with gloves, for manual focus adjustment.
Compact and lightweight for a better seal and no wrist fatigue.

DESIGN

Smooth lines and surface.
Excellent workmanship and quality materials make the device resistant and easily sanitizable.
Adaptor with magnetic connection that allows to use the device in combination with any smartphone

CONSTANTLY EVOLVING TO MAKE THE
VISION OF THE SKIN MORE ACCURATE
